OLYMPIAR 2026

“Orebody to Ecosystem: Integrating Mining Performance and Environmental Resilience”

This year, 627 participants from 209 teams took part in the first round of OlympiAR. These participants come from Undergraduate programs at 45 different universities in Indonesia representing a diverse study programs including geology, mining, metallurgy, geophysics, and environmental.

2nd ROUND OLYMPIAR
DATA PROVIDED

OLYMPIAR 2026

Organized By:

Supported By:

DATA PROVIDED

Exploration Surface Data			
Data Type	Content	Format	Description
Soil Sampling	X, Y, Z, Description, Assay Multi Element.	csv	
Rock Sampling	X, Y, Z, Lithology, Alteration, Oxidation, Mineralization, Assay Multi Element.	csv	
River		shp	
Regional Geology	Report	pdf	For regional approach

DATA PROVIDED

Organized By:

Supported By:

Drillhole Surface Data			
Data Type	Content	Format	Description
Collar	Hole_ID, From, To	Csv	
Survey	Azimuth, Inclination, Depth, EOH	Csv	
Geological Logging	Lithology, Alteration, Oxidation, Mineralization	Csv	
Drillhole Assay	Assay Multi Element	csv	

Survey Data			
Data Type	**Content**	**Format**	**Description**
Topography		Dxf	
DEMNAS		tiff	

DATA USAGE ANNOUNCEMENT

Attention all users,

We would like to remind you that all the data provided by the committe is **CONFIDENTIAL**. Users are not permitted to use, share, or save the data without **PERMISSION**. We expect awareness and compliance from all users regarding this rule during this round. The ioGAS software is **ONLY USED** for OlympiAR data analytics. Any other usage of ioGAS outside of the competition is **PROHIBITED**. Thank you for your attention.

2nd ROUND OLYMPIAR REPORT

OLYMPIAR 2026

Organized By:

Supported By:

OUTPUT EXPECTED

Organized By:

Supported By:

All participants are expected to make **A COMPREHENSIVE REPORT** about **EXPLORATION and ENVIRONMENTAL** impact through any analysis from the data which has been provided. The **mandatory** structure of this report are:

1. Introduction
2. Location and Regional Geology
3. Data Validation (Surface & Sub-surface)
4. Surface Data
5. Sub-surface Data
6. Environmental Analysis
7. Exploration Synthesize
8. Conclusion
9. Reference

The Software that can be used are

1.Microsoft Office (Word and Excel)
For make a report and any analysis and data preparation

2.IMDEX ioGAS
For data analysis including the plotting, statistical analysis, downhole drilling plotting, regarding the drilling, geochemistry and environmental data

3.QGIS
For making a map and section

You can only use the software listed. If you want to use other software, it must be free and not pirated. No other software is allowed.

OUTPUT EXPECTED

Organized By:

Supported By:

The detailed structure of this report are;

1. Introduction
2. Location and Regional Geology
3. QAQC and Data Validation
    - QAQC of surface and subsurface data
    - Outlier treatment
    - Threshold value of element
    - Determine the lithologhy, alteration zone, mineralization based on Supervised/Unsupervised Machine Learning
    - Evaluation between lithology, alteration, and mineralization based on machine learning and original data (data provided)

4. Surface Data
    - Analysis of soil sampling data
    - Analysis of rock sampling data
    - Geochemical zonation (including map of zonation)
    - Comprehensive analysis and next exploration targeting based on analysis
    - High, medium, and low grade zonation using unsupervised machine learning
    - Zone comparison evaluation

OUTPUT EXPECTED

Organized By:

Supported By:

5. Drilling Data
    - Drilling data variation and database
    - Drillhole data correlation
    - Geochem-Stratigraphy (including maximum 3 pcs of cross / long section)

6. Environmental Analysis
    - Acid Mine Drainage
    - PAF & NAF classification including the workflow / flowchart of the classification
    - Comprehensive report about the environmental impact of exploration and mining, also the treatment of PAF NAF material
    - PAF & NAF rock clustering using unsupervised machine learning

7. Exploration Synthesize
    - Mineralization prospecting synthesis
    - Further exploration stage of geological synthesis with attach maximum of 4 pcs cross / long section.

8. Conclusion
9. Reference

BONUS

Organized By:

Supported By:

Make further **EXPLORATION DESIGN** based on your analysis considering the geological and environmental impact on your analysis and design (you can make it by map or cross/long section)

Attach it into **section 7 of Exploration Synthesize**

Reporting Guidelines

- Language : Bahasa
- Font : Times new roman
- Font Size : 16 for Heading, 14 for Sub-Heading, 12 for content, 12 for name picture/graph/table
- Font Color : Black
- Orientation : Portrait (if needed, some map / section can be landscape)
- Column : one column
- Picture : HD quality
- EYD : Follow Tata Bahasa Indonesia with Ejaan Yang Disempurnakan
- Reference : Link and attach all reference on the reference list.
- **All forms of plagiarism will be strictly dealt with.**

All the 2nd Round result sent by email to committee through **olympiar2026@gmail.com** no later than **7th November, 2026 at 23.59 WIB.**

The content that will be sent

1. Data validation (csv format)
2. ioGAS Project
3. Geochemistry analysis (csv format)
4. Comprehensive Report (pdf)
5. PowerPoint Presentasion (pdf)

Download and install the latest ioGAS software (v8.3.1) from our website at **https://www.imdex.com/software/iogas.** Make sure to click on the Download button (not Request a Trial):

1. Start the ioGAS software.
2. If the trial period is active go to Licence Server Connection on the Help ribbon

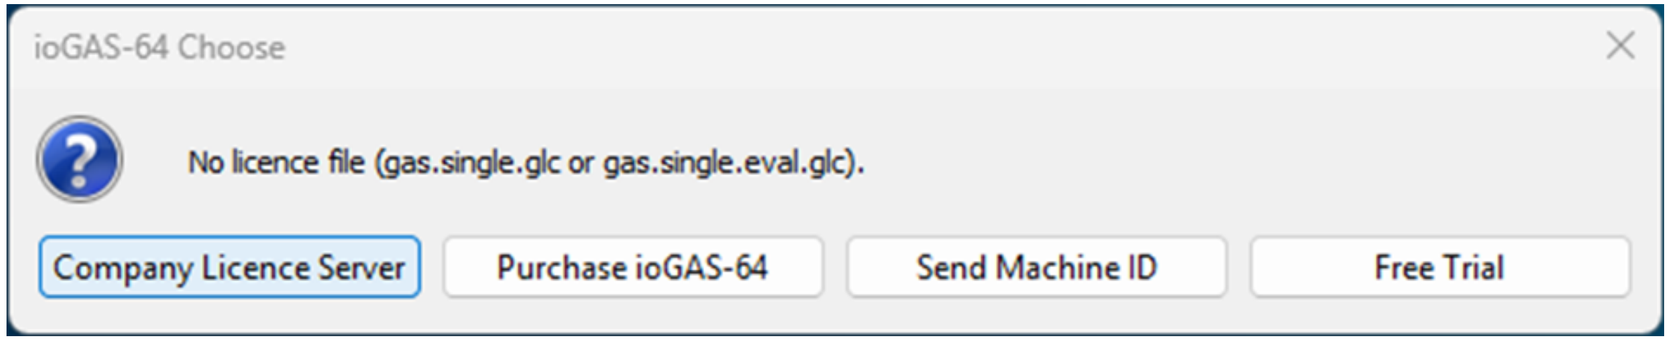

ioGAS Activation Tutorial

Organized By:

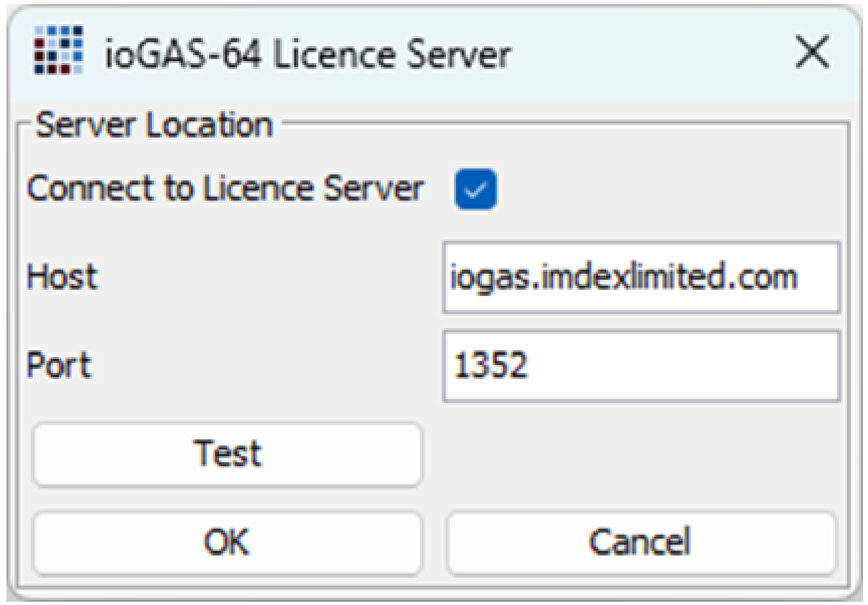

Supported By:

OR if the ioGAS trial period has expired, click on the Company Licence Server button in the ioGAS Choose dialog:

3. In the **Licence Server** dialog:

   a. Check the Connect to Licence Server box
   b. Enter Host = **iogas.imdexlimited.com**
   c. Enter Port = **1352**
   d. Click OK

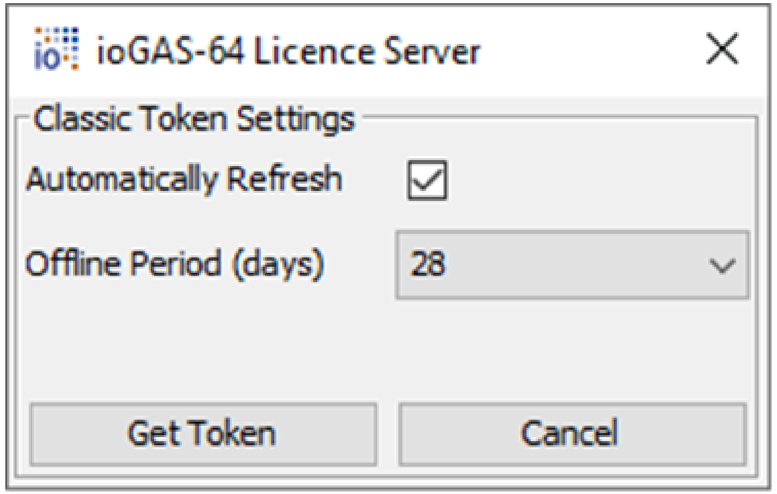

ioGAS Activation Tutorial

Organized By:

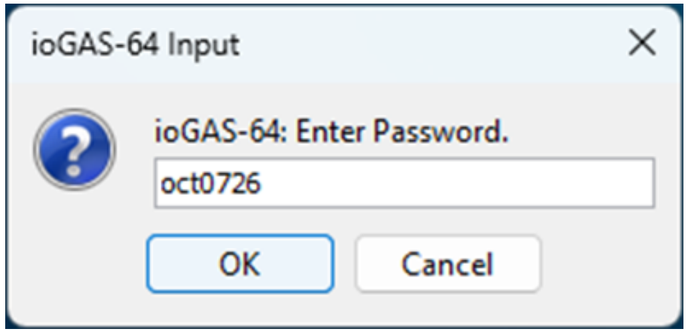

Supported By:

4. Click on the **Get Token** button in the following dialog:

A 14-day temporary licence is downloaded onto the computer. (Note selection of a different checkout time will not change the 14-day offline period).

5. When ioGAS is restarted the user will be prompted for a password. The password (Case sensitive) is **oct0726**

ioGAS Activation Tutorial

Organized By:

Supported By:

This password will need to be entered each time the ioGAS software is started.

6. When the software is successfully connected the ioGAS screen should look like this:

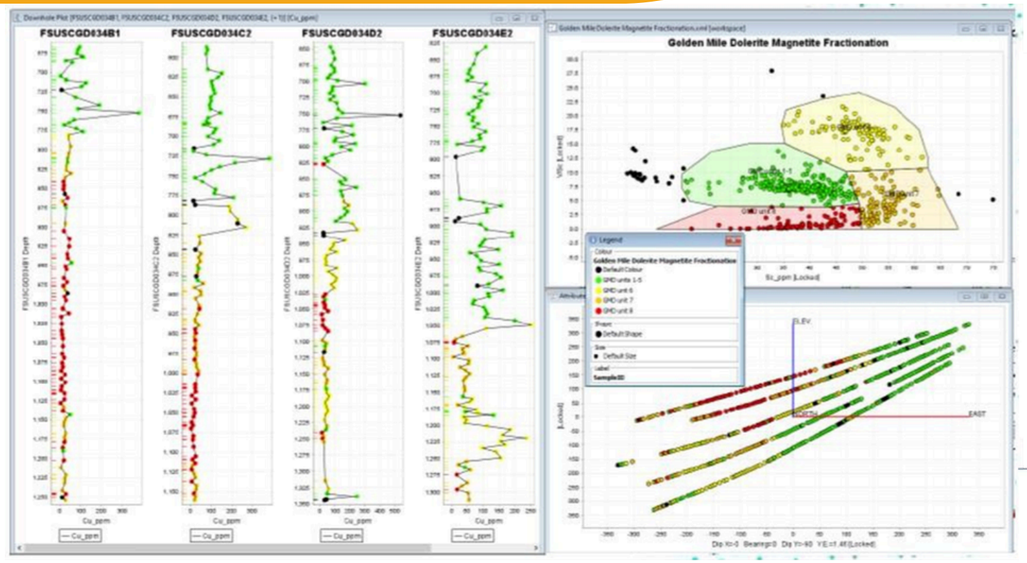

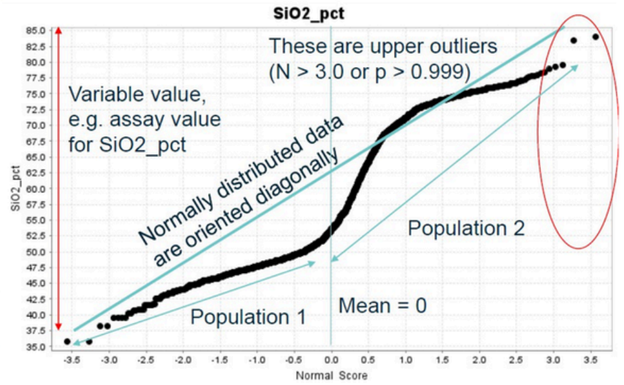

ONE team just have ONE ioGAS Licence for ONE laptop / PC
